## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 5 and 6 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is nothing in the specification to indicate that the claimed molecular weight of the compatibilizer is weight average molecular weight. The fact that the molecular weight of the polyacetal is weight average molecular weight does not necessarily mean that the molecular weight of the compatibilizer is measured the same way.

### ***Claim Rejections - 35 USC § 102***

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
4. Claims 1, 7 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Flexman et al. 5,344,882.
5. Flexman teaches 50-80% polyacetal, 10-20% polyurethane and 0.009-12% of an ethylene/glycidyl(meth)acrylate/alkyl(meth)acrylate terpolymer. See claims 1-3 and 10-11. Applicant's claims are not novel.

***Claim Rejections - 35 USC § 103***

6. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
7. Claims 1, 5-9 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Flexman 5,344,882, in view of Burg et al. 3,642,940, Burg et al. 5,039,741 or Tanigawa et al. 6,399,699.
8. All references have been discussed previously. Burg et al. ('940) is cited for alternative impact modifiers, Burg et al. ('741) for the core-shell copolymer and Tanigawa et al. for the boron trifluoride catalyst, which ingredients are customarily used with polyacetals and therefore would have been obvious to one of ordinary skill in the art, at the time the invention was made, to substitute them into the composition of the primary reference, in order to achieve optimum properties.

***Conclusion***

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
